

CASINO

FROM GTECH G2

GTECH G2 is renowned for its realistic games, tastefully recreated for online players, with an artistic attention to detail. Naturally, all the most traditional casino games are available in both downloadable and instant-play versions. An online casino system from GTECH G2 is custom designed according to your specifications. Adapt your casino's visual style, language, primary currency and games selection to be true to your recognized brand and to suit the customers in your unique market niche.

GTECH G2's casino system is built with an open architecture so you can easily add new games and other applications to alter your operation as your customers' preferences change.

INSTANT CASINO

There is no quicker route to the gaming action than through our instant-play games. Consider offering a selection of instant-play casino games to complement your downloadable casino software. Instantplay casino games can also be offered within your bingo, poker or sports book operation as side games to boost the entertainment value of your gaming site. GTECH G2 can create exclusive instant-play games – such as customised scratch tickets and slot machines – to promote your unique brand.

LANGUAGES

The casino client is available in the following 13 languages:

English ■ German ■ French ■ European ■ Spanish ■ Italian ■ Greek ■ Czech ■ Bulgarian ■ Turkish ■ Hungarian ■ Swedish ■ Polish ■ Russian.

Other languages available upon order.

CURRENCIES

The instant casino supports the following currencies, but others can be added upon request: ■ Dollar ■ Euro ■ Pound Sterling ■ Turkish Lira ■ Ruble ■ Renminbi

FEATURES

Start Page/Portal

The player accesses the Instant Casino games through a web page or a portal, which serves as the 'Lobby'. All services such as log in, 'start game', jackpot values, etc are accessed through the Portal Widgets solutions.

Available Widgets

The following portal widgets in Flash format are available for Casino portal developers:

■ Casino Flash Lobby
 ■ Recent Winners
 ■ Casino jackpots
 ■ Tournament Schedule (download)
 ■ Tournament Winners (download)
 ■ Biggest Winners
 ■ Most Popular Games
 ■ Newest Games

Widget Store

All widget configuration is done using the Widget Store and all the portal developer need to do is add a single line of code on the portal page. Widgets can be updated without having to update the portal page. Using the Widget Store, widgets can be defined by number of settings, for example; colours, gradients, fonts and sizes.

Widget Functionality

Widgets offer additional functionality (other than presentation of information), including the ability to:

- Start instant casino games
- Include player-specific data
- Navigate to a defined page on the portal

Gaming Management System

The Instant Casino is managed by the operator through the Gaming Management System (GMS) – standard Edition.

Game History

Operators are able to see game histories with a graphical display of outcomes through Gaming Management System.

Bonus Program

Create promotional bonus campaigns.

Comp Program

Set comp ratios for games and allow players to gather comp points when playing, which they can then convert to real money.

Refer a Friend

Players can refer friends and receive bonuses upon new registrations and deposits.

DOWNLOAD CASINO

LANGUAGES

The casino client is available in the following languages:

■ English ■ German ■ French ■ Spanish (American) ■ Spanish (European) ■ Italian ■ Portuguese ■ Portuguese (Brazilian) ■ Dutch ■ Swedish ■ Danish ■ Greek ■ Turkish ■ Russian ■ Czech ■ Polish ■ Bulgarian ■ Hungarian ■ Cantonese (simpl/trad) ■ Mandarin (simpl/trad) ■ Japanese ■ Spanish (Catalan) ■ Romanian

CURRENCIES

The casino client is available in the following currencies:

■ Dollar ■ Euro ■ Pound Sterling ■ Turkish Lira ■ Ruble ■ Renminbi

THE CLASSIC LOBBY can be graphically customised to resemble the grandeur of a brick-and-mortar casino lobby.

THE MODERN LOBBY is designed to appeal to the Internet-savvy with its efficient window-style control panel.

FEATURES

Multiplayer

Most table games cater to up to 5 players. Chat, play and enjoy the games together with your friends.

Tournament Play

Tournaments add a whole new dimension to your online casino, attracting more players out for entertainment and the joy of a good competition.

Responsible Gaming

Offer an enjoyable, responsible and positive gaming experience for all of our players. Let the players set their own loss, wager and time limits and play responsibly.

Installation While Registering

Automatic download and installation of the casino client in the background so that players can start to play immediately after finishing registration.

Game History

Operators are able to see game histories with a graphical display of outcomes through GMS.

Back Office

The Casino is managed by the operator through the Gaming Management System (GMS).

Bonus Program

Create bonus campaigns.

Comp Program

Set comp ratios for games and allow players to gather comp points when playing, which they can then convert to real money.

Refer a friend

Players can refer friends and receive bonuses upon new registrations and deposits.

Player Messages

In-game messaging system between operator and players.

In-Game Promotion

Promotions can be presented within the game in dynamic areas, configurable from the back office interface.

In-Game Help

Centrally stored help texts that players can access from the casino client.

Free Games

An effective marketing tool, allowing operators to attract and reward players with free slot machine rounds.

Supervisor Mode

Approved casino personnel can now be permitted to supervise players in multiplayer games.

Common Casino

Operators with GMS-enabled casinos can cooperate with each other by referring their players to a common casino network.

Multilanguage Support

Enables players to change to a preferred language in the client.

Flash Support

Flash support for promotional banners.
