

# POKER

FROM GTECH G2

## INTERNATIONAL POKER NETWORK

The International Poker Network (IPN) is the most popular network in Europe in terms of cash players and one of the largest networks in the world in terms of size. IPN players feel comfortable knowing the network enjoys an excellent reputation for honest games and superb service. IPN members include well-established gaming corporations players trust by name such as Yahoo! UK, Sportingbet and Virgin Games.

The IPN is free of any internal conflict of interest among the companies that administrate it. GTECH G2 owns and makes sure that the network is managed professionally. GTECH G2 does not own any poker operators or brands. The revenue from IPN is based solely on rake from the independent members/operators.

## POKER MANAGEMENT

The IPN Management team's main responsibility is to optimize revenue for the IPN by providing services in the following areas:

### Tables and Tournaments

- Set up, monitor and adjust game tables
- Manage, schedule and prepare tournaments – such as network, guaranteed, private, offline satellites
- Organise and host live events
- Report tournament results
- Monitor multi-table tournaments to prevent fraud

### Bonuses

Set up and configure the following types of bonuses:

- Raked hands bonuses ■ Deposit/Reload bonuses ■ Refer a Friend bonuses ■ Rake back bonuses

### Network Rules

- Enforce IPN Network rules in areas such as bonuses, rake back, and affiliate set up
- Investigate rake back
- Call centre staff frequently monitor the site for abnormalities such as foul language, wrong language spoken at the tables and other misbehaviour.

### Reporting and Analysis

- Defect reporting and follow up
- Reporting and follow up for VIP players
- Game play analysis and disputes

### IPN Poker Site

- Maintain and manage ipnpoker.com

## FRAUD AND SECURITY

The IPN management team's primary responsibility is to ensure reliability. Fraud-control and security staff handles issues related to:

- Fraud identification and prevention
- Collusion
- Risk assessment of players

### Services Provided

- Proactive fraud control and account locking
- Identification and reporting of fraudulent accounts to partners
- Identification and reporting of bonus abuse accounts to partners and poker management
- Identification and reporting of collusion accounts to partners and players via customer services
- Review of suspicious accounts requested by partners
- Assessment and management of player buy-in limits
- Risk assessment of new and high net win/loss accounts

### Versatile Poker Solutions

GTECH G2's acclaimed poker platform and the Web-Dollar payment solution serve as the solid

foundation for the International Poker Network. The modular architecture of a gaming system from GTECH G2 makes it easy to add an online poker room to an existing online gaming operation and manage a heterogeneous operation through a central administrative interface.

An online poker room can easily be integrated with existing customer databases and other online gaming systems. A straightforward XML-based API with a well-defined set of integration functions is utilized for this task. Through just one registered account, a player can enjoy the poker games as well as all the other casino games, bingo games and other online games and betting alternatives the operator wishes to offer.
